University of California

CDL

California Digital Library

CDL was founded by the University of California in 1996

University of California Curation Center (UC3) is CDL's program concerned with maintaining, preserving, and adding value to digital research data throughout its lifecycle UC3 areas of focus:

- Research data management
- Data publication and data metrics
- Persistent identifiers
- Digital preservation
- Data/software skills training

DMPTOOL.ORG

A platform for DMP creation and guidance with templates for US funders (NSF, NIH, DOE, DOT, etc.) and many international funders.

Free, open-source community-supported tool working off of the shared DMPRoadmap codebase.

80K+ users from over 363 participating institutions around the world.

NIH DMSP TEMPLATE WORKING GROUP

Working group consisting of data librarians to build and update the NIH DMSP templates.

Additional work is being done by an education sub-committee producing associated educational resources.

OSF Collection with materials to promote the DMPTool: <https://osf.io/uadxr/>

SUPPORTING FEDERAL REQUIREMENTS (NIH/NSF CHIPS & SCIENCE ACT) & GUIDANCE (OSTP)

The DMP Tool is flexible, integrated, and multi-faceted. It can be tailored to meet campus-specific needs and provides:

- ✓ Best practice guidance to ensure DMPs are structured and optimized.
- ✓ Funder-specific templates that campuses can customize to ensure their requirements are considered.
- ✓ A mechanism for registering a DMP ID.
- ✓ A communication vehicle that supports data stewardship between librarians and researchers at scale.

WHITE HOUSE
OFFICE OF SCIENCE
AND TECHNOLOGY
POLICY (OSTP)
UPDATED U.S.
POLICY

The memorandum updated U.S. policy guidance to develop and implement new policies making all tax-payer funded scholarly research **and underlying raw data freely** and publicly available without embargo by **December 31, 2025.**

The new policy removes the optional 12-month embargo from public access to federally funded research.

This guidance covers all federal agencies with research and development expenditures. (Was only those >100M)

Metadata requirements, including the use of PIDS. Stipulates the use of repositories in alignment with the National Science and Technology Council (NSTC) Desirable Characteristics of Data Repositories for Federally Funded Research.

CUSTOMIZE TEMPLATES

Two kinds of question-level customizations:

1. **Example answer:** You can provide an example answer for a specific question (e.g., about specific metadata standards or institutional repository details). This will be displayed below the question as a researcher is writing a plan based on that template.

2. **Guidance:** You can provide additional guidance text that will appear in the panel to the right of the question for that

Templates

Create a template

If you wish to add an organizational template for a Data Management Plan, click the 'Create template' button. You can create more than one template, e.g., one for researchers and one for graduate students. Your template will be presented to users within your organization when no funder templates apply. If you want to add questions to funder templates use the 'Customize template' options below.

CUSTOMIZE GUIDANCE

Themes work like tags to associate questions and guidance.

Questions within a template can be tagged with one or more themes.

Administrators can then create guidance by theme to apply their advice over all templates at once. This also alleviates the need to update guidance each time a new template is released.

Guidance

<p>First create a guidance group. This could be organization-wide or a subset, e.g., a particular College/School, Institute, or department. When you create guidance you must assign it to a guidance group.</p>

Guidance group list

Create a guidance group

Name	Status ↕	Optional subset ↕	Last updated ↕	
University of California, San Francisco	Published	No	02-25-2018	Actions

Guidance list

Create guidance

You can write pieces of guidance to be displayed by theme (e.g., generic guidance on storage and backup). Writing generic guidance by theme saves you time and effort as it will be displayed across all templates rather than having to write guidance for each.

If you do have a need to provide guidance for specific funders that would not be useful to a wider audience (e.g. if you have specific instructions for applicants to NIH for example), you can do so by adding guidance to a specific question when you edit your template.

Clear and detailed documentation is essential for data to be understood, interpreted, and used. Data documentation describes the content, formats, and internal relationships of your data in detail and will enable other researchers to find, use and properly cite your data. Be sure to document: <ul style="list-style-type: none">Variable names and descriptionsExplanation of codes and classification schemes usedAlgorithms used to transform data (may include computer code)File format and software (including version) used	Metadata & documentation	University of California, San Francisco	Published	02-25-2018	Actions <ul style="list-style-type: none">EditUnpublishRemove
The file format you choose for your data is a primary factor in someone else's ability to access it in the future. Think carefully about what file format will be best to manage, share, and preserve your data. Try to choose formats that are: <ul style="list-style-type: none">Non-proprietaryOpen, with documented standardsIn common usage by the research communityUsing standard character encodings (i.e., ASCII, UTF-8)Uncompressed (space permitting)	Data format	University of California, San Francisco	Published	02-25-2018	Actions

Request expert feedback

Click below to give data management staff at DMPTool, the Plan Owner's org, access to read and comment on your plan.

Dear Researcher,

"How to Use the DMPTool to Write Your NIH Data Management and Sharing Plan" has been sent to your DMPTool account administrator for feedback.

Please email uc3@cdlib.org with any questions about this process.

You can continue to edit and download the plan in the interim.

Request feedback

This plan is based on the "NIH-GEN DMSP (Forthcoming 2023) " template provided by National Institutes of Health (nih.gov) - (ver: 0, pub: 2021-01-29).

Data Type (0 / 3)

Briefly describe the scientific data to be managed, preserved, and shared.

A general summary of the types and estimated amount of scientific data to be generated and/or used in the research. Describe data in general terms that address the type and amount/size of scientific data expected to be collected and used in the project (e.g., 256-channel EEG data and fMRI images from ~50 research participants). Descriptions may indicate the data modality (e.g., imaging, genomic, mobile, survey), level of aggregation (e.g., individual, aggregated, summarized), and/or the degree of data processing that has occurred (i.e., how raw or processed the data will be)

GENERATE A PERSISTENT IDENTIFIER

A DMP ID is a unique persistent identifier for data management plans.

DMP-IDs are automatically linked to the creator's ORCID account and included as work on their ORCID profile page.

It makes DMPs citable and promotes transparency in research

Facilitates connecting research outputs, funding, and plans, making reporting easier and facilitating automated compliance checks.

The screenshot shows the 'Finalize / Publish' step in the DMPTool interface. The top navigation bar includes 'Project Details', 'Collaborators', 'Write Plan', 'Research outputs', 'Download', and 'Finalize / Publish'. The main content area is titled 'Set plan visibility' and includes a red arrow pointing to it. Below the title, a note states: 'Public or organizational visibility is intended for finished plans. You must answer at least 50% of the questions to enable these options. Note: test plans are set to private visibility by default.' There are three radio button options: 'Private: visible to me, specified collaborators and administrators at my organization' (selected), 'Organization: anyone at my organization can view', and 'Public: anyone can view'. A 'Save' button is located below these options. The second section is titled 'Register your plan and add to ORCID' with a red arrow pointing to it. Below this title, a note says: 'Get a DMP ID for your data management plan.' followed by 'In order to register your plan you must have completed the following:'. A list of four items follows: 'answered at least 50% of questions' (marked with a red X), 'identified your funder' (marked with a green checkmark), 'authorized DMPTool to add works to your ORCID record via your Third party applications page' (marked with a red X), and 'plan is not a mock project for testing, practice, or educational purposes' (marked with a green checkmark). A final note states: 'Once the steps above are satisfied, a button to register your plan will appear here.'

Set plan visibility

Public or organizational visibility is intended for finished plans. You must answer at least 50% of the questions to enable these options. Note: test plans are set to private visibility by default.

- ☒ Private: visible to me, specified collaborators and administrators at my organization
- ☐ Organization: anyone at my organization can view
- ☐ Public: anyone can view

Save

Register your plan and add to ORCID

Get a DMP ID for your data management plan.

In order to register your plan you must have completed the following:

- ☒ answered at least 50% of questions
- ☒ identified your funder
- ☒ authorized DMPTool to add works to your ORCID record via your [Third party applications page](#)
- ☒ plan is not a mock project for testing, practice, or educational purposes

Once the steps above are satisfied, a button to register your plan will appear here.

Project description

Cancer survivors are a growing population in the United States; more than 16 million currently live in the US and by 2030 this number is expected to exceed 22 million. It is

QUESTIONS FOR DISCUSSION

The new policy requires that researchers “maximize the appropriate sharing of scientific data.”

What do you imagine the impact of this new policy will be on your work?

How do you imagine you'd utilize the funds available for data management?

Are there additional tools or services that would help you?

Maria Praetzellis

THANK YOU!

maria.praetzellis@ucop.edu
